Your journey to freedom begins here.

If you are one of the millions of people in the United States suffering from plantar warts, let the journey to Freedom begin. Left untreated, the HPV Virus will persist and is unlikely to resolve. We are here to help. Call to book an appointment to find out more about how Swift can help get you back on your feet.

Say goodbye to Stubborn warts.

swift

What is Swift?

Swift is the pioneering new microwave therapy device for skin. Plantar warts have long been a frustrating condition and finally there is an answer. Unlike other destructive treatment methods. Swift targets the root cause of the wart, the HPV Virus. Microwave energy is introduced into the skin, heating cells to between 109 and 114 degrees Fahrenheit. This heat initiates an immune cascade which allows the body to detect and attack the HPV virus, ridding the patient of this painful condition.

Freedom through Innovation

FDA CLEARED

How does the treatment work?

3-4 TREATMENTS 4 WEEKS APART	FOLLOW UP AFTER 12 WEEKS	2 SECONDS / 5 APPLICATIONS

Treatment protocol includes an average of 3-4 visits with each treatment lasting only 5-10 minutes. During each treatment you will receive multiple 2 second doses of microwave energy, total dosage will vary based on the size and age of the lesion. Visits are spaced 4 weeks apart to coincide with the body's immune cycle, with follow up scheduled for 12 weeks following the final treatment. Complete resolution is aligned with the strength of your body's immune response.
